SECTION 31.1  The Milky Way Galaxy, continued

In your text, read about stellar distribution in the Milky Way. Use the terms below to label the diagram. Each term may be used more than once.

disk  globular cluster  halo
nuclear bulge  Population I  Population II

Answer the following questions.
31. What are Population I stars? How do they differ from Population II stars?

32. Where does most star formation take place?

33. What does the type of stars found in the halo and bulge indicate?

34. What two theories explain how the spiral arms are maintained?
