State Executive Summary

Information in this section taken from “Dropout Data Report, 2009-2010”, Department of Public Instruction.

North Carolina General Statute 115C-12(27) requires the compilation of an annual report of students dropping out of schools in the state. Dropouts are reported for each Local Educational Agency (LEA) and charter school in the state, and “event dropout rates” are computed. The event dropout rate, or simply the “dropout rate,” is the number of students in a particular grade span dropping out in one year, divided by a measure of the total students in that particular grade span. Rates are calculated for grades 7-12 and 9-12.

The event rates are also referred to as “duplicate” rates, since a single individual may be counted as a dropout more than once if he or she drops out of school in multiple years. However, no student who drops out is counted more than once each year. For the purposes of this analysis, dropouts do not include students below the compulsory school age or students in Pre-kindergarten or Kindergarten.

A dropout is defined by State Board policy (HSP-Q-001) as “any student who leaves school for any reason before graduation or completion of a program of studies without transferring to another elementary or secondary school.” For reporting purposes, a dropout is a student who was enrolled at some time during the previous school year, but who was not enrolled (and who does not meet reporting exclusions) on day 20 of the current school year. Schools that cannot document a former student’s enrollment in a US school must report that student as a dropout. An exception is made for students who are known to have left the country.

Schools are allowed to exclude from their dropout count “initial enrollees,” students who leave school within twenty days of their first enrollment in a particular LEA, or school district. Reporting exclusions also include expelled students and students who transfer to a private school, home school, or a state-approved educational program. Students who are not enrolled on day 20 because they have serious illnesses or are serving suspensions are also not counted as dropouts. Since 1998, dropout rates have included students who leave the public schools to attend community colleges.

The Program Monitoring and Support Division in the North Carolina Department of Public Instruction collected and compiled dropout data submitted by each local school district and charter school. The data are self-reported by the districts, and the State agency does not conduct an official audit. The school districts across the state began submitting their data in October 2010. To facilitate accurate reporting, DPI ran error checks and placed error reports and listings of apparent duplicate dropouts on a secured website for review by the schools and LEAs. Corrections and verifications were completed by all schools and LEAs by December 2010.

General Findings

High schools in North Carolina reported a dropout rate of 3.75%, a substantial decrease from the 4.27% rate reported from the previous year.

Grades 9-12 reported 16,804 dropouts in 2009-2010, a decrease of 2,380 from the 19,184 total reported in 2008-09. There were decreases in 70% (81 of 115) of the Local Educational Agencies (LEAs).

Dropout Rates:

- o LEAs reporting the lowest dropout rates are Chapel Hill-Carrboro, Elkin City, Dare, Union, Newton Conover City, Cherokee, Gates, Iredell-Statesville, Tyrrell, and Mooresville City.
- o LEAs reporting the highest dropout rates are Hyde, Vance, Swain, Person, Bertie, Whiteville City, Kannapolis City, Hickory City, Sampson, and Rockingham.
- o The largest 3-year decreases in grades 9-12 dropout rates were seen in Graham, Gates, Clinton City, Jackson, and Burke.
- o LEAs with the largest 3-year rate increases were Bertie, Whiteville City, Alleghany, Hyde, and Washington.

Dropout Count:

- o The 16,804 dropouts recorded in grades 9-12 represented a 12.4% decrease from the 19,184 reported in 2008-2009.
- o The largest 3-year decreases in dropout count for grades 9-12 are found in Charlotte-Mecklenburg, **Forsyth**, Gaston, Randolph, and Cabarrus.
- o LEAs with the largest 3-year dropout increases are Wayne, Bertie, Whiteville City, Alleghany, and Camden.

Gender, Race, and Age:

All ethnic groups contributed to the decrease in the number of reported dropouts. The dropout rate for American Indian students declined for the sixth consecutive year. Males accounted for 59.4% of the reported dropouts. The numbers of high school students dropping out at all ages decreased, except those 20 years of age and older.

Reason Codes:

For the sixth consecutive year, there is an increase in the "Enrollment in a Community College" dropout reason code. Attendance issues are again the reason most often noted for a reported dropout, accounting for 41.4% of all dropouts.

§115C-12. Powers and duties of the Board generally.

(27) Reporting Dropout Rates, Suspensions, Expulsions, and Alternative Placements. - The State Board shall report annually to the Joint Legislative Education Oversight Committee and the Commission on Improving the Academic Achievement of Minority and At-Risk Students on the numbers of students who have dropped out of school, been suspended, been expelled, or been placed in an alternative program. The data shall be reported in a disaggregated manner and be readily available to the public. The State Board shall not include students that have been expelled from school when calculating the dropout rate. The Board shall maintain a separate record of the number of students who are expelled from school.

Trends and Categorical Data

North Carolina's dropouts and dropout rates over time

North Carolina recorded 16,804 dropouts in grades 9-12 for 2009-2010, a 12.4% decrease from the count reported in 2008-2009. It was the fewest number of high school dropouts reported since the early 1990s and the fewest ever since exemptions for students leaving for community college were disallowed beginning in the late 1990s.

The grade 9-12 dropout rate in 2009-2010 was 3.75, a substantial decrease from 2008-09. The 0.52 percentage point decrease in the dropout rate was a 12.2% reduction. The rate of 3.75 was the lowest grade 9-12 dropout rate ever recorded in North Carolina.

Dropouts and dropout rates from 1999-2000 to 2009-2010 are shown below in Figure 1.

Figure 1. Grade 9-12 dropout events and rates from 1999-2000 to 2009-10.

The dropout rate is calculated as follows:

$$\frac{\text{Number of Dropouts}}{[(20\text{th Day Membership } 2009-10\text{-FM}20\text{s} + 20\text{th Day Membership } 2010-11) / 2] + \text{Number of Dropouts}}$$

The subtraction of “FM20s” is a very minor adjustment to the denominator. FM20s are “initial enrollees” who were enrolled on the 20th day in the 2009-10 school year. Initial enrollees are students who drop out after spending 20 days or less in their first enrollment in a particular LEA. Because initial enrollees are exempt from dropout reporting, they must be removed from the measure of enrollment in the denominator.

Ages and grades of dropouts

In 2009-10, as in past years, students dropped out most frequently at grade 9 (32.1%), followed by grade 10 (26.9%), grade 11 (23.2%), and grade 12 (14.7%). The high school grade with the largest percentage decrease in dropouts from 2008-09 to 2009-10 was the 12th (-15.7%), followed by the 9th (-14.2%). The proportions dropping out in each high school class are comparable to those in 2008-09. Three 2009-10 dropouts were 13th graders (in Early Colleges) and were included with 12th graders in this analysis.

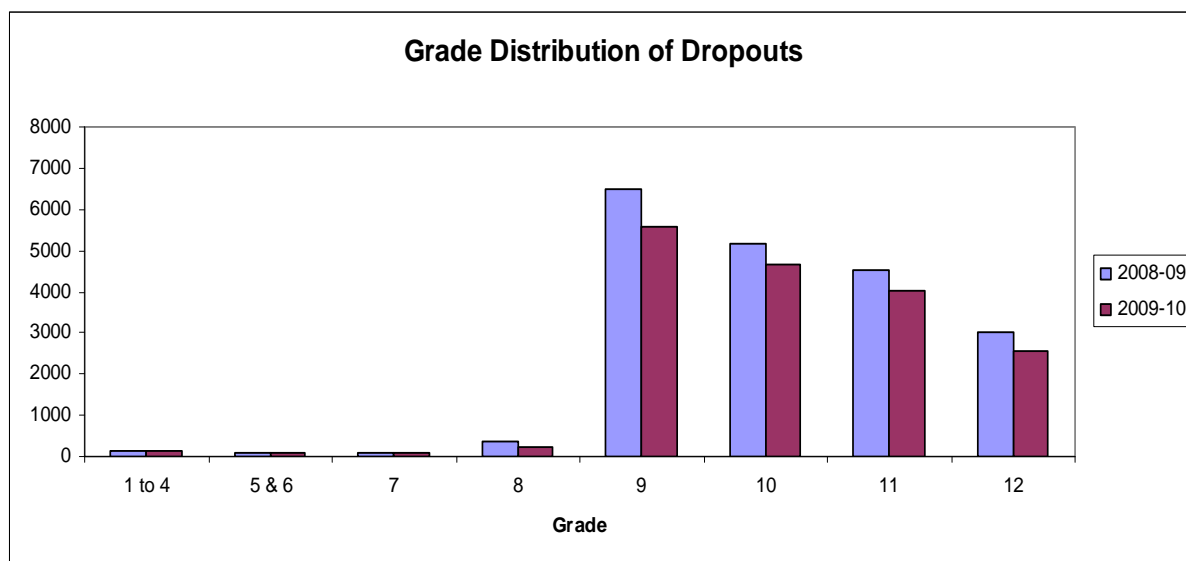

Figure 2. Frequency distribution of 2008-2009 and 2009-10 dropouts by grade

North Carolina’s compulsory school law, G.S. 115C-378, requires school attendance for all children between the ages of seven and 16. It is reasonable, therefore, that dropout events increase in frequency as students reach 16 years of age. Figure 3 shows the distribution of dropout events by student age for 2008-09 and 2009-10. Note that the most frequent age of dropouts is 17. The largest reduction in numbers of dropouts occurred with 16-year-olds, followed closely by 17-year-olds.

Figure 3. Frequency distribution of 2008-09 and 2009-10 dropouts by age.

Reasons for dropping out

State law (G.S. 115C-47) requires that local boards of education put in place a mechanism for referring dropouts to appropriate services. Many districts require exit conferences, which provide an opportunity for a discussion of the reasons for the decision to drop out. In most districts, school social workers or school counselors are responsible for documenting the reasons for dropping out.

By their very nature, dropout counts can be difficult to investigate, and there are circumstances when a school official has to provide an “approximate” reason for a student’s leaving school. A reason code of MOVE is often used when the student cannot be located.

The attendance (ATTD) code has historically been used when one of the more specific reasons was not applicable. In 2007, DPI took action to clarify the circumstances when ATTD should be used. The Dropout Data Collecting and Reporting Procedures Manual published online in August 2007, defined ATTD for use when “the student dropped out due to excessive absences that caused the student to become ineligible or in jeopardy of becoming ineligible to receive course credits.”

In order to reduce the inappropriate labeling of dropouts due to attendance factors, UNKN (“Unknown”) was introduced as a reason coded for 2007-2008. UNKN is to be used when no other reason for the dropout can be cited. Three additional reason codes were added for the 2007-2008 dropout data collection. Table 1 lists the new reason codes implemented in 2007-2008.

As a result of these actions, the use of the reason code ATTD has been reduced, but it still accounts for approximately 40% of all dropouts.

Table 1. Dropout Reason Codes Added in 2007-2008.

Code	Reason
ENGA	Lack of engagement with school and/or peers
EXPC	Expectations of culture, family, or peers
LANG	Difficulties with English language
UNKN	Unknown

Table 2 displays the frequencies of all reason codes that were submitted for dropout events that occurred in grades 9 through 12.

Table 2. Grade 9-12 Dropout Reason Codes Reported in 2009-2010

Reason	Code	Count	Percent
Attendance	ATTD	6909	41.1%
Enrollment in a community college	COMM	3719	22.1%
Unknown	UNKN	1489	8.9%
Academic problems	ACAD	784	4.7%

Marriage	MARR	20	0.1%
Difficulties with English language	LANG	6	0.0%
	Total	16804	100.00%

Students who are expelled from a school and who fail to return to school are coded with "Expulsion" (EXPL) as a reason for dropping out. In accordance with NC General Statute §115C-12 (21), expelled students are not to be counted in the dropout rate, therefore, these dropout events are not included in the official counts or rates that appear in this report. In 2009-2010, there were 61 grade 9-12 dropout events coded with EXPL.

Table 3 shows the change in the proportions of reason codes reported from 2008-09 to 2009-10.

Table 3. Changes in Proportions of Grade 9-12 Dropout Reason Codes Reported in 2008-09 and 2009-10

Reason	Percent 2008-2009	Percent 2009-2010	Change in Percent
Attendance	42.0%	41.1%	-0.6%
Enrollment in a community college	21.1%	22.1%	1.0%
Unknown	8.3%	8.9%	0.6%
Academic problems	6.1%	4.7%	-1.4%
Moved, school status unknown	4.4%	4.4%	0.0%
Lack of engagement with school and/or peers	2.0%	3.5%	1.5%
Failure to return after a long-term suspension	3.1%	2.9%	-0.2%
Choice of work over school	2.7%	2.7%	0.0%
Incarcerated in adult facility	1.7%	1.9%	0.2%

Employment necessary	0.5%	0.5%	0.0%
Suspected substance abuse	0.2%	0.3%	0.1%
Expectations of culture, family, or peers	0.3%	0.3%	0.0%
Marriage	0.1%	0.1%	0.0%
Difficulties with English language	0.1%	0.0%	-0.1%
Totals	100.0%	100.00%	0.0%

It is possible that in this 2009-2010 dropout data collection, the "Attendance" (ATTD) reason was still being reported for students who "disappear" with no known reason (instead of UNKN). We expect over the next few years for the number of the ATTD codes to continue to decrease and the number of the UNKN codes to increase.

Tracking reason codes over time can assist in identifying the changes in both the outside incentives and the environmental stressors that can lead to dropouts. Figure 4 shows the variation in proportions of the six most frequently reported reason codes (other than ATTD) over the last seven years. The data points for UNKN (Unknown) are shown for 2007-08, 2008-09, and 2009-10.

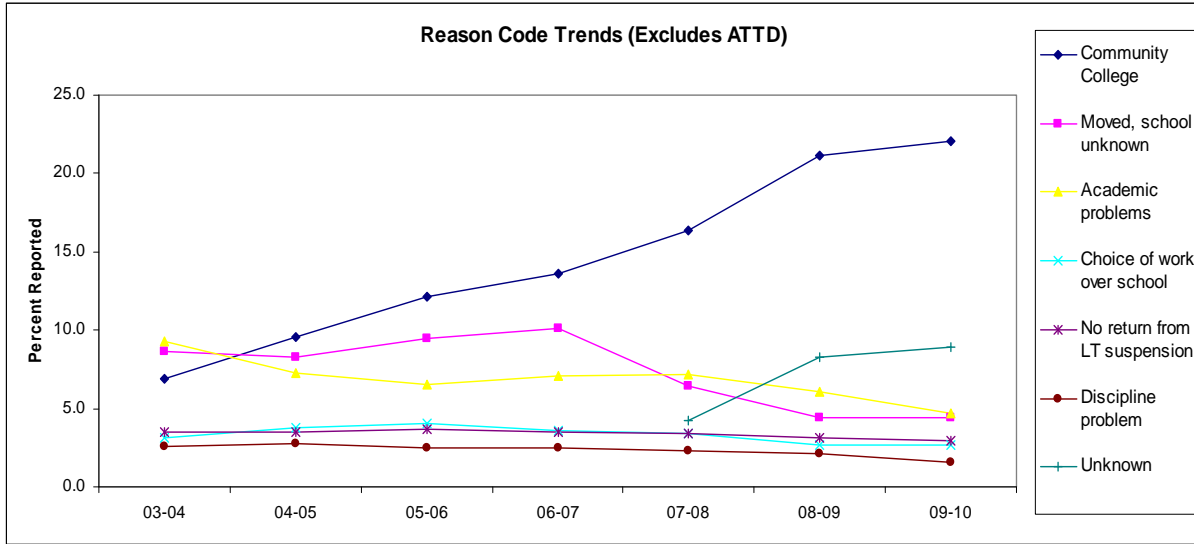

Figure 4. Proportions of grade 9-12 dropout reason codes reported.

For the sixth year in a row, an increasing proportion of dropouts were coded as leaving school to take part in a community college program. According to state guidelines, students leaving to attend community college programs must be counted as dropouts.

The dropout reporting rules in North Carolina require that schools record a dropout for each student who is known to have moved away from the area, but who cannot be verified as attending school elsewhere. In these cases, a reason code of MOVE is used. As seen in Figure 4, the proportion of grade 9-12 MOVE reason codes declined in both 2007-08 and 2008-09 and then leveled off in 2009-10. The introduction of the new Unknown (UNKN) code in 2007-08 may help explain this decline. The combined proportion of MOVE and UNKN codes in 2008-09 and 2009-10 is approximately the same as the proportion of MOVE codes used in 2006-07.

It is possible that a number of dropouts coded as MOVE or UNKN are "false positives," because students may be attending school in some unknown location. However, the requirement to report them provides a necessary incentive to locate all students with the goal of enrolling them in school.

Gender and race of dropouts

Historically, males have dropped out more frequently than females, and this pattern was again seen in the 2009-10 dropout data. Males accounted for 59.4 % of the dropouts, up from 59.0% in 2008-09.

Table 4 shows the contribution of each ethnic group to the total increase in dropouts reported in 2009-10. Note that all groups contributed to the decrease in dropouts reported. White students had the largest percentage decrease (14.9%), followed by black students (11.4%) and multiracial students (10.5%).

Table 4. Change in Grade 9-12 Dropout Event Counts by Ethnicity, 2008-09 to 2009-10.

Ethnic Group	2008-2009	2009-2010	Change
American Indian	339	314	-25
Asian	194	179	-15
Black	7019	6219	-800
Hispanic	2030	1901	-129
Multiracial	532	476	-56
White	9070	7715	-1355
TOTAL	19184	16804	-2380

Figure 5 below shows that Hispanic, American Indian, and black students had higher dropout rates than the state average. The state's grade 9-12 dropout rate in 2009-10 was 3.75. American Indian students, however, left school at a rate of 4.86, Hispanic students dropped out at a rate of 4.79, and the dropout rate for black students was 4.78. These rates for minority students represent continuing improvements over the past few years, as will be seen in Figure 6.

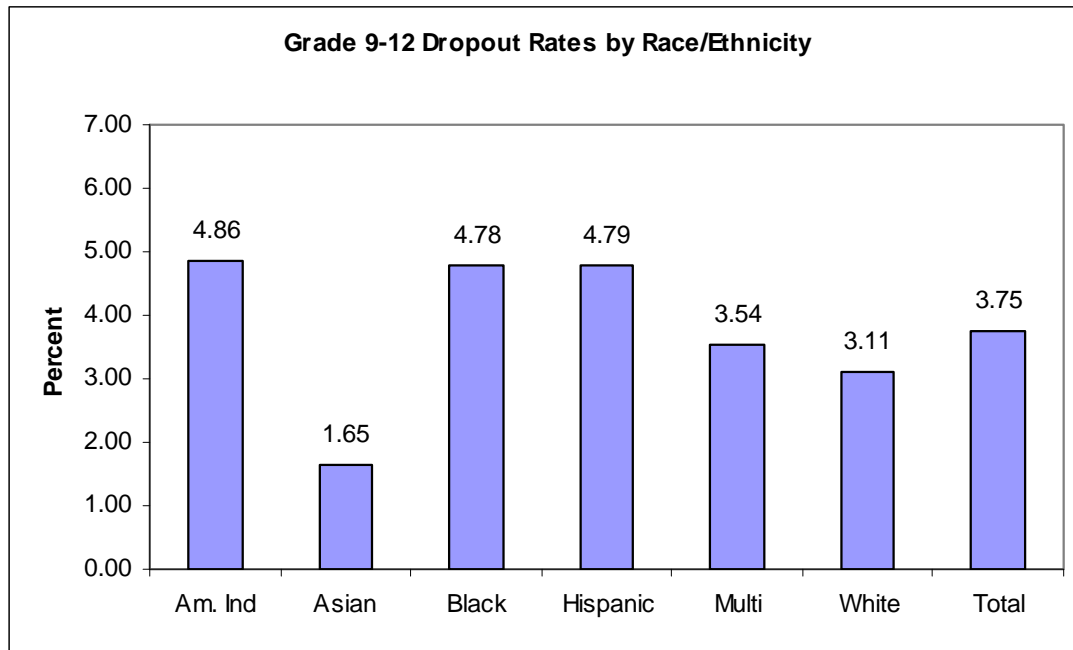

Figure 5. 2009-2010 grade 9-12 dropout event rates by ethnicity.

Figure 6. Grade 9-12 dropout event rates among ethnic groups, 2005-06 to 2009-2010.

Figure 6 shows the dropout rates for each group over time. The dropout rates for all groups fell to their lowest levels in the last four years. Hispanic students had the largest percentage decrease. The one-year 0.94 percentage point decrease to a rate of 3.54 was a 21.1% decrease from the 2008-09 rate of 4.48.

Hispanic students also experienced a substantial dropout rate decrease of 0.92 percentage points. This was a 16.1% decrease in the dropout rate.

Figure 7 illustrates the grade 9-12 dropout rates among ethnic/gender groups. Black male students have the highest dropout event rate at 5.79, followed by American Indian males at 5.65, Hispanic males at 5.34, Hispanic females at 4.20, multiracial males at 4.15, and American Indian females at 4.00. All other groups had rates lower than or equal to the state average of 3.75.

Figure 7. Grade 9-12 dropout rates among ethnic/gender groups for 2009-10.

Figure 8 shows the changes in grade 9-12 dropout rates for ethnic/gender groupings from 2006-2007 to 2009-2010. All groups saw continuing rate decreases over this period, and the overall rate decreased 28.4% during this time. The largest rate decreases were achieved by Hispanic females (2.86 points, 40.5%), American Indian females (2.66 points, 40.0%), American Indian males (3.11 points, 35.5%), Hispanic males (2.87 points, 35.0%), and Asian males (1.11 points, 34.6%). All groups had a three-year decrease of at least 20%.

The state rate decrease of 0.52 points from 2008-09 to 2009-10 was a 12.2% decrease. Multiracial females had the largest one-year dropout rate decrease, 23.9%. Other groups with rate decreases larger than the overall average of 12.2% were Hispanic females (19.6%), multiracial males (19.1%), Asian females (17.6%), American Indian males (14.7%), white females (14.4%), white males (13.4%), and Hispanic males (13.3%).

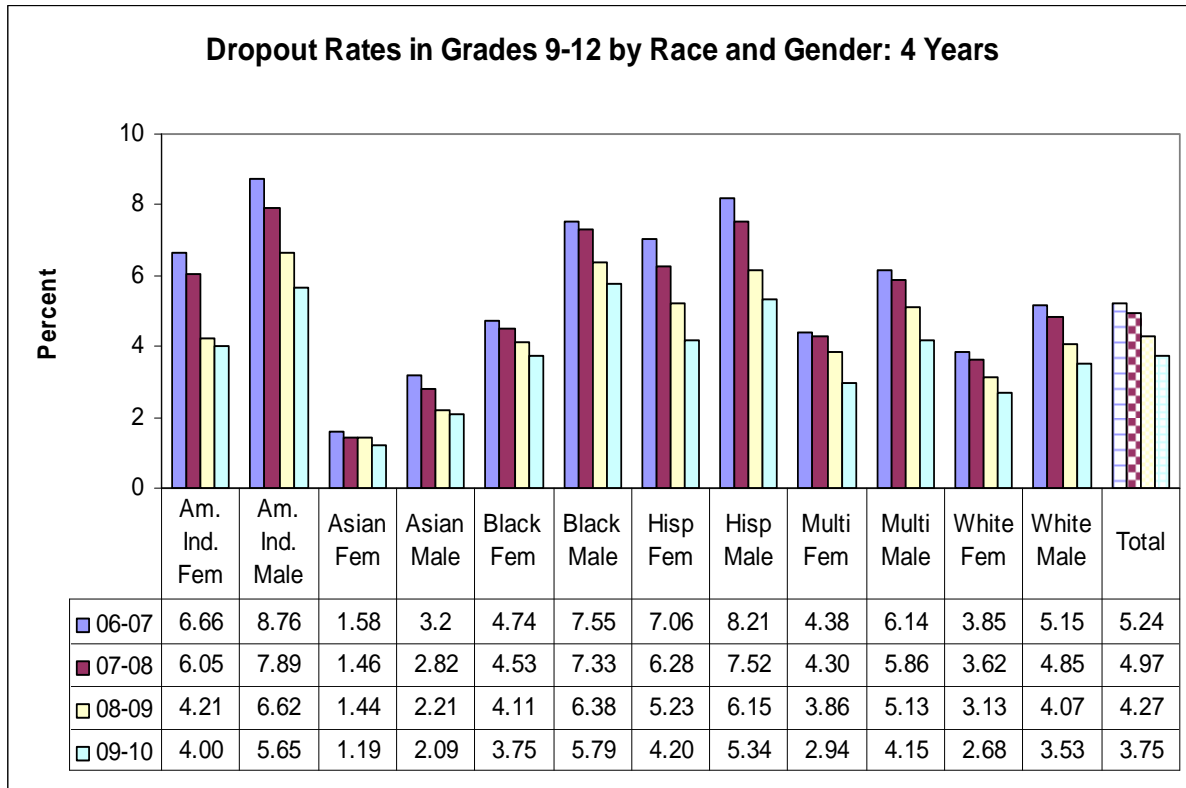

Figure 8. Grade 9-12 dropout event rates for ethnic/gender groups, 2008-09 to 2009-10.

Summary of Trends

In 2009-2010, dropout counts and rates decreased in North Carolina's public schools for the third consecutive year. The analysis of trend data revealed the following significant findings:

- 1) The overall high school dropout rate has decreased 28.4% (1.49 points) over the last three years. The rate of 3.75 for 2009-10 is the lowest ever recorded in the state.
- 2) The dropout count of 16,804 was the fewest number reported since the early 1990s and the fewest ever since exemptions for students leaving for community college were disallowed beginning in the late 1990s.
- 3) There was a continuation of the trend in increased proportions of dropouts being attributed to students' choosing to leave school to participate in community college programs. In 2009-10 students leaving school for community college accounted for 22.1 % of the reasons for dropping out of school.
- 4) Despite vast improvements in recent years, three male groups continue to experience the highest dropout rates. The rates for black (5.79), American Indian (5.65) and Hispanic (5.34) males are over one point higher than all other ethnic/gender groups. For the first time in 2009-10, the dropout rate for black females dropped to equal the state average of 3.75.

Office of Dropout Prevention, Intervention & Recovery Services

Mission Statement

Effective dropout prevention is a comprehensive programming effort that targets individual students, parents, school personnel and the community at large. Winston-Salem/Forsyth County School's dropout prevention efforts are predicated upon the belief that each student is unique and must be nurtured in a manner that will meet their individual needs. To this end, the Winston-Salem/Forsyth County Schools Office of Dropout Prevention, Intervention and Recovery Services promotes comprehensive dropout strategies that are grounded in research and address locally identified needs.

Table 5 provides an overview of the dropout data for grades 7-12 over the past twenty one years. The chart at the top of page 15 provides a line graph depicting the information.

Table 5. Twenty One Years of Forsyth County's Dropout Data 7-12

Year	Membership	Dropout Number	Dropout Rate
1989-1990	16,631	890	5.07
1990-1991	16,166	752	4.45
1991-1992	15,877	582	3.36
1992-1993	15,993	652	3.75

2006-2007	15,465	1062	6.43
2007-2008	15,438	898	5.49
2008-2009	15,364	769	4.76
2009-2010	15,344	652	4.07

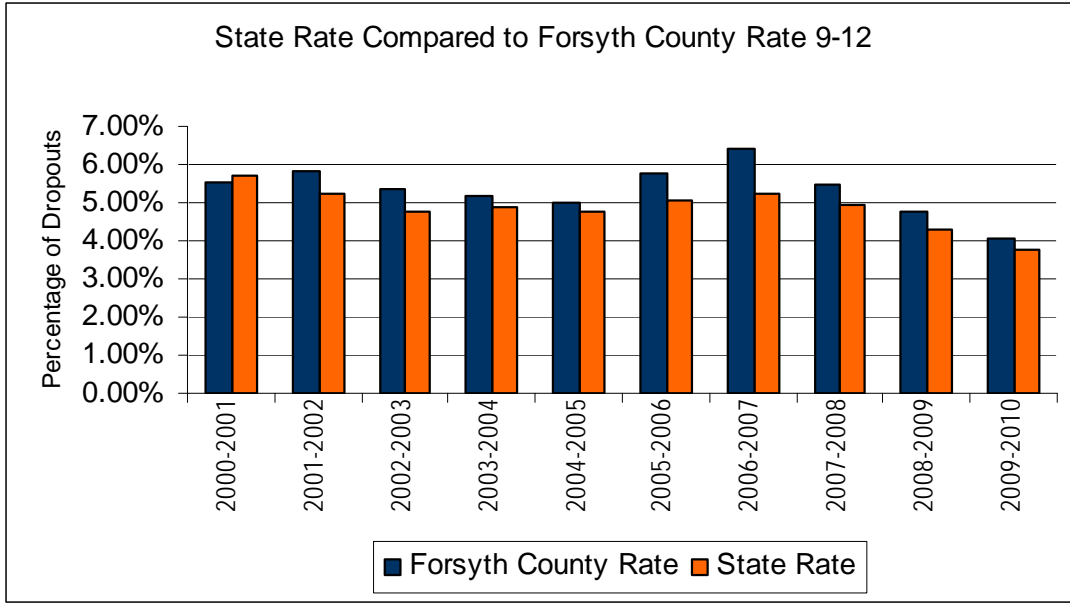

Table 8 provides a comparison of the State Dropout Rate 9-12 over the past ten years to that of Forsyth County. The graph on top of page 18 depicts the State Rate compared to Forsyth County rate 9-12.

Table 8. State Rate Compared to Forsyth County Rate 9-12

Year	State Rate	Forsyth County Rate
2000-2001	5.71%	5.54%
2001-2002	5.25%	5.82%
2002-2003	4.78%	5.33%
2003-2004	4.86%	5.18%
2004-2005	4.74%	5.00%
2005-2006	5.04%	5.74 %
2006-2007	5.24%	6.43%
2007-2008	4.97%	5.49%
2008-2009	4.27%	4.76%
2009-2010	3.75%	4.07%

The graph below displays the number of students that dropped out (blue diamond) compared to the dropout rate (orange square) for the last 11 years.

Dropout rates are computed at DPI using the following formula:

Total Number Dropouts

[(20th Day Membership 2009-10 minus FM20s + 20th Day Membership 2010-11) / 2] + Numerator

GRADES 7-12

Membership-20 th day 2009-2010	22,982	
Membership-20 th day 2010-2011	23,158	
Total Dropouts	666	(2.81%)

GRADES 9-12

Membership-20 th day 2009-2010	15,364	
Membership-20 th day 2010-2011	15,344	
Total Dropouts	652	(4.07%)

Note: Membership-20th day number based on Principal Monthly Report, Minus Violations Column

Dropout Summary Grades 1-12

Students in grades one through six had no dropouts reported during 2009-2010. Table 9 provides the grade distribution for dropouts for the 2009-2010 school year.

Table 9. Distribution of Dropouts Forsyth County (1-12)

Grade(s)	Number of Students	Percentage of Students
1-6	0	0.00%
7	2	0.30%
8	12	1.80%
9	189	28.38%
10	149	22.37%
11	191	28.68%
12	123	18.47%
Total	666	100%

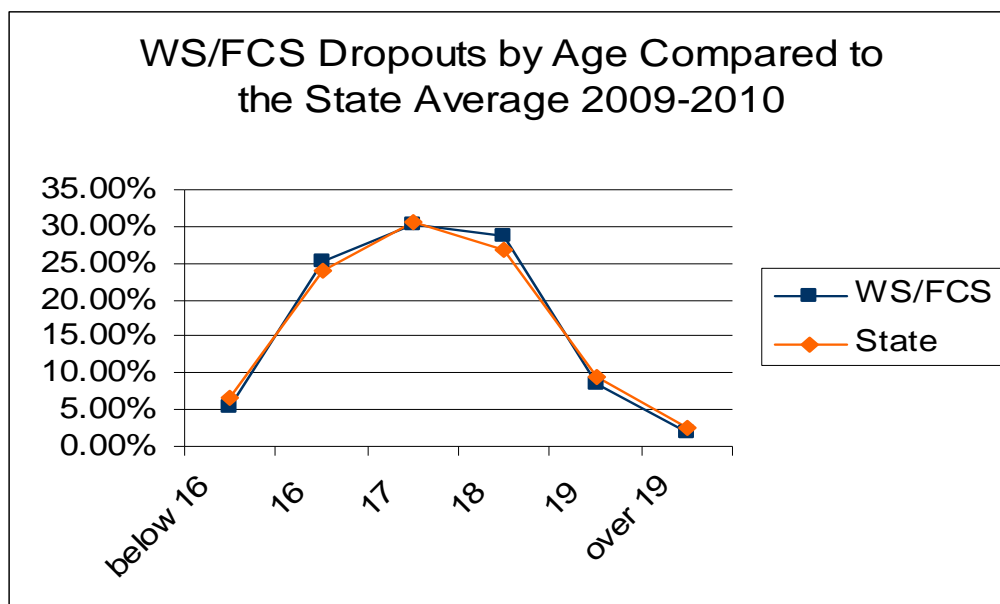

Students below the age of 16 comprised 5.26% of the dropouts during 2009-2010. All students under the age of 16 are subject to the compulsory attendance law (G.S. 115C-378). Until such time as the student reaches age 16, the Winston-Salem/Forsyth County Schools are obligated to continue to document efforts to bring the students back into the public school system. Table 10 provides the numbers and percentages for the ages of dropouts.

Table 10. Age Breakdown of Dropouts Forsyth County (1-12)

Age	Number of Students	Percent of Students
below 16	35	5.26%
16	169	25.38%
17	202	30.33%
18	192	28.83%
19	56	8.41%
over 19	12	1.80%
Total	666	100%*

* Due to rounding numbers total percentage may not equal 100%

The graph below displays the percentage of WS/FCS Dropouts by age (blue square) compared to the State Dropout Average by grade (orange diamond) for the 2009-2010 school year.

Tables 11 and 12 show a breakdown of WS/FCS students that dropped out by race and gender 2009-2010

Table 11. Ethnic Breakdown of Dropouts Forsyth County (7-12)

Ethnicity	Number of Students	Percentage of Dropouts	Percentage of Membership
White	207	31.08%	46.69%
Black	294	44.14%	32.95%
Hispanic	127	19.07%	14.26%
Other (American Indian, Asian, Multi-Racial)	38	5.71%	6.11%
Total	666	100%	100%*

Total	666	100% *	100%*

* Due to rounding numbers total percentage may not equal 100%

Exceptionality Classification:

In grades 7-12, 17.87% of the dropouts had been enrolled in an exceptional children's program (119 students).

National Origin Minority Students:

In grades 7-12, 4.65% of the dropouts were participants in English as a Second Language (ESL) Program (31 students).

Reasons for Dropping Out:

The reasons for dropping out of school provided by school personnel for students in grades 7-12 are reflected in Table 13 as well as in the graph below.

Table 13. Reasons Given for Dropping Out of School Forsyth County (7-12)

Number of Students	Percent	Reason Given for Drop
0	0.00%	Suspected substance abuse
39	5.86%	Academic problem
311	46.70%	Attendance
1	0.15%	Need to care for children

Individual High School Descriptive Dropout Summary Rate

Data collection procedures for the State Dropout Report target a number of variables on student dropouts. Summary statistics on these variables help define at-risk populations and should be used for focusing on dropout prevention efforts.

This section will consist of five tables which will provide the descriptive dropout summary data for each high school along with information on dropouts who have participated in the Exceptional Children's (EC) Program and have taken English as a Second Language (ESL) Program. Tables 18 – 36 provide the following information for each high school:

- (a) - Age Distribution of Dropouts
- (b) - Grade Distribution of Dropouts
- (c) - Ethnic Distribution of Dropouts
- (d) - Gender Distribution of Dropouts
- (e) - Special Program Information
- (f) - Dropout Reasons

High School Graduation Rate

*Information from this section is taken from "How North Carolina Counts Dropouts"
Department of Public Instruction.*

North Carolina counts students who leave school before graduation in two main ways, an Annual Dropout Rate and a Cohort Graduation Rate. These two ways of measuring the same phenomena are different from each other and provide different perspectives on students' leaving school. This overview gives details about the Cohort Graduation Rate.

The Cohort Graduation Rate is a measure that illustrates what percentage of ninth grade students graduated from high school four years later. The 2010 rate, released in July 2010, illustrated the percentage of the 2006-07 first time ninth graders who graduated from high school by June 30, 2010.

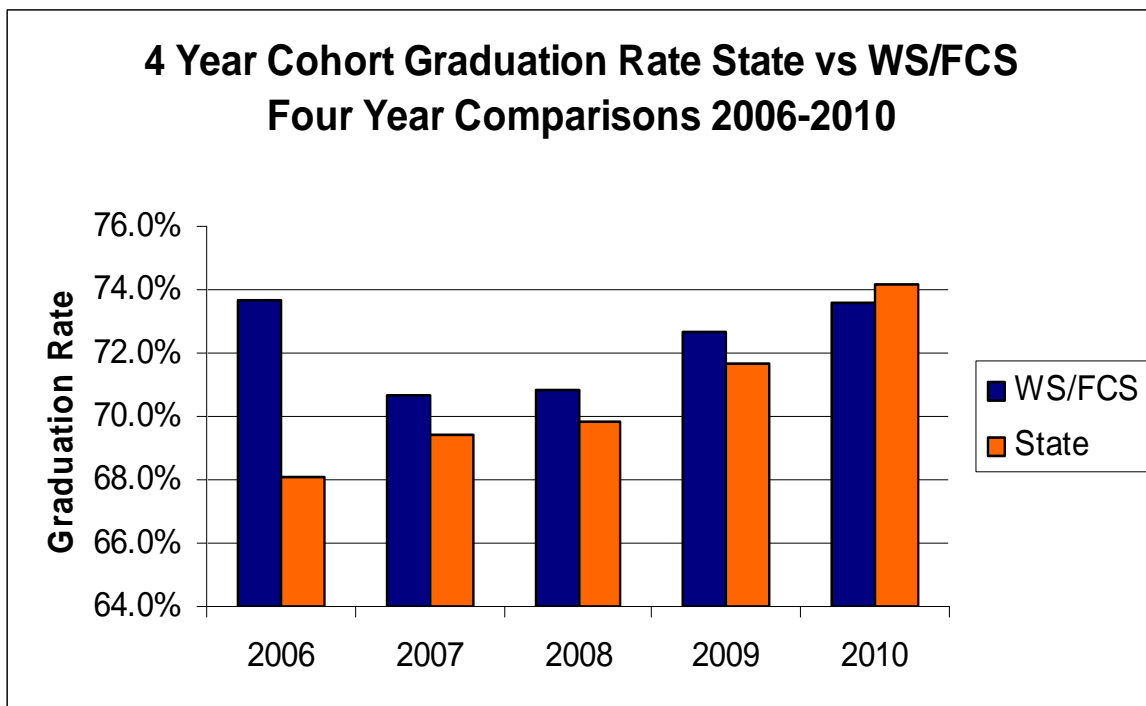

The four-year cohort rate will not reflect students who may take five years to graduate from high school. The NC Department of Public Instruction releases a five-year graduation rate separately from the four-year cohort rate. The five-year graduation cohort rate reflects the number of students who graduate with a diploma by June 30th of the following year.

Forsyth County's 2010 four year cohort graduation rate was 73.6 percent. The four year cohort graduation rate measured the percentage of first-time high school ninth graders in 2006-07 that graduated in four years or less.

Table 37 provides an overview of the 4 Year Cohort Graduation data for Forsyth County for the past four years.

Table 37. Four Year Cohort Graduation Data			
Year	Graduates	Cohort Number	Graduation Rate
2005-2006	2438	3310	73.7%
2006-2007	2496	3531	70.7%
2007-2008	2723	3845	70.8%
2008-2009	2938	4042	72.7%
2009-2010	3048	4140	73.6%

The graph below compares the 4 Year Cohort Gradation Rate for Forsyth County to the State Average.

The graph below shows Forsyth County's 2010 Graduation Rate by school (blue diamond) compared to the average State Graduation Rate (orange square).

The chart below displays Forsyth County's 2010 average graduation rate of 73.6 percent (green triangle), compared to the state average of 74.2 percent (orange square), compared to graduation rates of individual Forsyth County high schools (blue diamond).

Individual High School Graduation Data

This part of the Graduation section consists of four charts which will provide the descriptive Graduation summary data for each high school along with information on Graduates who have participated in Special Programs including Economically Disadvantaged, Limited English Proficient and Students with a Disability. Charts provide the following information for each high school:

- (a) – Four-Year Cohort Graduation Rate Comparison
- (b) – Ethnicity Comparison to State, District
- (c) – Ethnicity, Gender Comparison
- (d) – Special Program Information

Atkins School of Biotechnology

Implications

Winston-Salem/Forsyth County Schools' Office of Dropout Prevention, Intervention, and Recovery Services is designed to help students realize their potential. Its main focus areas include: prevention, intervention and recovery.

- Prevention: Early recognition of students' academic needs related to school success.
- Intervention: District and school strategies, services and programs designed to ensure students continue their education.
- Recovery: Identification and follow up with students who have dropped out of school-encouraging them to return to school or helping to place them in productive academic environments that support their needs.

The Office of Dropout Prevention, Intervention, and Recovery Services is dedicated and committed to accomplishing its main goal-to decrease the number of students who drop out of school. It works to attain this goal by:

- Implementing successful prevention and intervention strategies for the benefit of all students.
- Encouraging students to develop and display resiliency in the face of adversity.
- Supporting opportunities for staff, community, and parent involvement at the elementary, middle and high school levels.
