

1. What are the
four basic
states of
matter?

2. How is a liquid different from a solid?

**3. How is a
gas different
from a liquid?**

4. How is plasma different from a gas?

5. What is the most common state of matter for each of the following examples of matter?

a. Gold

b. Milk

c. Helium

d. Silver

6. WHAT IS THE MOST COMMON STATE OF MATTER FOR EACH OF THE FOLLOWING EXAMPLES OF MATTER?

A. WATER

B. THE SUN'S SURFACE

C. MERCURY

D. LEAD

7. What is the most common state of matter for each of the following examples of matter?

a. Wood

b. Oxygen

c. Ink

d. Gasoline

8. What is the most common state of matter for each of the following examples of matter?

a. Carbon monoxide

b. Dry ice

c. Hydrogen

d. Copper
