

1. Volume= length x width x height **or** base area x height
2. Area = length x width
3. Perimeter = add **all** sides
4. Sides in a triangle= 3
5. Sides in a quadrilateral = 4
6. Sides in a pentagon = 5
7. Sides in a hexagon = 6
8. Sides in a heptagon = 7
9. Sides in an octagon = 8
10. Sides in a nonagon = 9
11. Sides in a decagon = 10
12. Unknown sides = n-gon
13. $\frac{1}{2} = 0.50$
14. $\frac{1}{4} = 0.25$
15. $\frac{3}{4} = 0.75$
16. Regular Polygon- all sides are congruent
17. Squares
 - 4 congruent sides & angles
 - 4 right angles
18. Rectangles
 - 4 sides & 4 right angles
 - Opposite sides are parallel & congruent
19. Rhombus
 - 4 sides are congruent
 - opposite angles are congruent
 - opposite sides are parallel
20. Parallelogram- opposite sides are congruent & parallel
21. Trapezoid- **ONLY** one set of parallel sides
22. Kite
 - 4 sides
 - two different pairs of adjacent sides that are congruent.
23. 1 cup = 8 ounces
24. 2 cups = 1 pint
25. 2 pints = 1 quart
26. 1 gallon = 4 quarts
27. 1 dozen = 12
28. 1 pound = 16 ounces
29. 1 ton = 2,000 pounds
30. 1 mile = 5,280 feet
31. 1 mile = 1,760 yards
32. 1 yard = 3 feet
33. 1 foot = 12 inches
34. Seconds in a minute = 60
35. Weeks in a year = 52
36. Minutes in a hour = 60
37. Days in a year = 365
38. Days in a week = 7
39. Hours in a day = 24
